

*Anxiety *Fear *Phobias

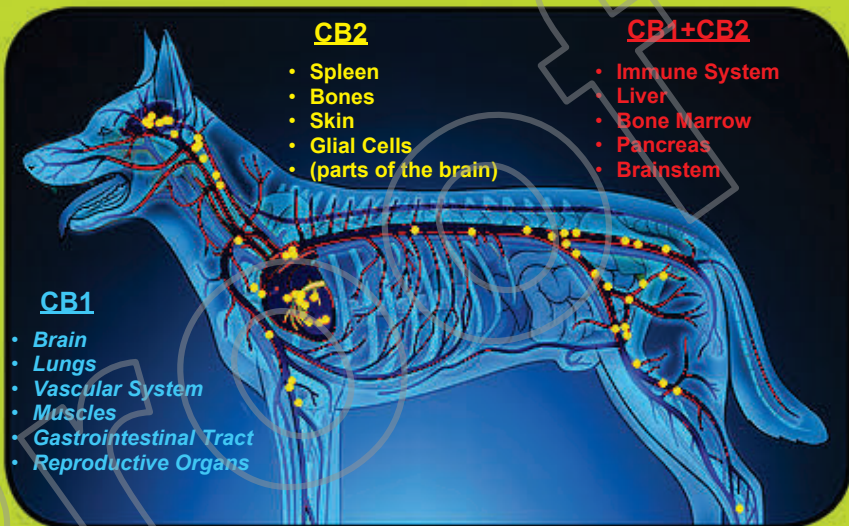

Sometimes our pets experience separation anxiety, fear of thunder, fireworks and loud noises. Even traveling to the vet or groomer can trigger phobias or aggressive behavior that can be helped with the right dosage.

*Inflammation *Pain *Swelling

As our animals age, they often have joint and mobility issues, more often larger breed dogs and horses. Inflammation and swelling are the number one cause of joint pain.

*Stress *Appetite *Seizures

CBD increases the comfort level of our pets while under stress such as transitioning into a new home or training. CBD can help to encourage the healing of deep emotional trauma of abuse or neglect by calming or soothing the nervous system. It has also been known to regulate the appetite and decrease or stop seizure activity.
